USE CASE DIAGRAM

The diagram illustrates the interactions between four main actors—Student, Supervisor, University Admin and Main Admin—and the system's key functionalities. The Student actor can perform use cases such as Manage Profile, Manage Project, Manage Milestone, Manage Task, Manage Documents, Manage Meetings, The supervisor actor oversees and manages meetings to monitor student progress. The university admin actor is responsible for managing the university structure to maintain organizational records and register both Students and Supervisors in the system as well as Mange Profile. Main Admin Responsibilities: Register University Admin and manage Profile. The diagram highlights the system's comprehensive support for project management, user administration, and academic structure.

Use Case Diagram

VISION

Student

Admin

UC1- Manage Profile

UC7- Manage University Structure

UC2- Manage Project
